

TALBRAGAR DISTRICT STRATEGY

- (1) *The development of the District should (a) reflect the overall Rural Strategy objectives but (b) emphasise the particular development opportunities and environmental constraints of the District.*
- (2) *The District Strategy defines the future role of the District within the Dubbo Rural Area Development Strategy and describes the main opportunities and constraints on which development of the District is to be based.*

**DUBBO CITY
RURAL AREA DEVELOPMENT STRATEGY
1995 - 2015**

Adoption

The Rural Area Development Strategy was adopted by Council as the rural policy package for Dubbo City Council at its meeting held on 4 December 1995 (refer clause 95/116 - Works and Services Committee meeting held 9/11/95).

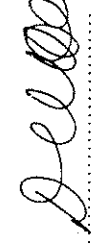

Application

The plan applies to all rural lands within the City of Dubbo that are included in each or any of the 7 rural districts (and including the Central District) as shown on page 6 of the Strategy dated September 1995. The Strategy shall be the basis of all of Councils' future decisions on the rural area.

Relationship To Other Plans

The Rural Area Development Strategy is designed to implement Councils' responsibilities under the Environmental Planning and Assessment Act, 1979. All of Councils' rural regulatory instruments (namely the Rural Area LEP 1996 and set of district DCP's when adopted) will act as mechanisms to further implement the concepts and direction of this Strategy.

TALBRAGAR DISTRICT STRATEGY

OVERVIEW

The Talbragar District constitutes cleared, undulating land of good to high agricultural value to the east of the city. The area is still relatively unfragmented and productive dryland farming is the dominate landuse. The district includes the Talbragar River and is part of the groundwater recharge area. It also includes the Beni National, and State, Forests and the Dunedoo Road and rail link. Other constraints from flooding and dryland salinity exist.

All of the development opportunities identified in the Strategy exist in one form or another in the Talbragar District. These opportunities and the constraints are discussed in more detail over the following pages.

DESCRIPTION

ENVIRONMENT	DEVELOPMENT CHARACTER	ECONOMIC SIGNIFICANCE
<u>CATCHMENT - EAST</u> Medium Capability Mid-low catchment Undulating Cleared	Large holdings Broadacre cropping and grazing of sheep and beef cattle Relatively distant from city Little subdivision impact Little conflict potential	High Agricultural Production - grazing and cropping
<u>CATCHMENTS - WEST</u> Low Capability Entire Small Catchments Undulating Remnant Timber	Medium holdings Extensive grazing and improved pastures (sheep and beef cattle grazing and fodder crops) Abuts Firgrove residential area Subdivision impact Moderate conflict potential	Moderate Agricultural Production - grazing
<u>FLOODPLAIN</u> High Capability Talbragar River - small floodplain Flat - Undulating Cleared	Medium holdings Broadacre cropping and grazing of beef cattle and sheep Small State Forest - Cypress Pine Subdivision impact Abuts urban area Moderate conflict potential	High Agricultural Production - grazing and cropping Moderate timber production Rail corridor Dunedoo Road

FEATURES Village of Ballimore, Wongarbon Reserve, Barbigal (hist), Ballimore Soda Springs, Beni "Village"

DEVELOPMENT OPPORTUNITIES

- Sustain grazing production
- Sustain cropping production
- Sustain timber production
- Aggregation of holdings to increase agricultural productivity

RELATIVE IMPORTANCE IN THIS DISTRICT OF THE DEVELOPMENT OPPORTUNITIES IN THE STRATEGY (See the Appendix)

	High	Medium	Low	Nil
Agriculture	✓			
Forestry	✓			
Tourism		✓		
Recreation		✓		
Transport		✓		
Settlement	Ballimore			✓
Mining		✓		
See Action Plan			See Appendix	

ENVIRONMENTAL CONSTRAINTS

- Talbragar River and Floodplain
- Timbered TSR's, Waterways, Beni State Forest, Beni National Forest and Wongarbon Nature Reserve have wildlife habitat and corridor significance
- Beni Corridor ie East catchments have moderate erosion susceptibility
- Aboriginal sites - Floodplain
- Dryland salinity Wongarbon - Dunedoo Road ie Mitchell and Plain Creeks
- Aquifer recharge area

TALBRAGAR DISTRICT ACTION PLAN

Council can influence outcomes in three main ways:-

- | |
|---|
| <ol style="list-style-type: none">(1) <i>Information, advice and advocacy</i>(2) <i>Regulation and control</i>(3) <i>Direct action and assistance</i> |
|---|

DEVELOPMENT OPPORTUNITIES

(1) AGRICULTURE

OBJECTIVE:

A MORE SECURE FUTURE FOR AGRICULTURE IN DUBBO AND EXPANSION OF ITS ECONOMIC VALUE

The Talbragar District comprises very high quality agricultural land that is most suited to broadacre cropping and grazing. Indeed this is the dominant land use in this district and it is believed to contribute significantly to Dubbo's economy. Council should therefore strive to reinforce these uses by actively applying the initiatives outlined below to protect and promote this land use.

POSSIBLE BENEFITS

- * Confidence to continue, expand and diversify existing agricultural enterprises.
- * A reliable local source of primary products for use in local value adding industries.
- * Protection and expansion of the city's existing agricultural economic base.
- * Maximise output from areas of high agricultural value
- * Continuing opportunities for on-farm employment.

APPROACH

The highest development priority of the Strategy is to support and encourage the existing agricultural sector of Dubbo. This means ensuring the agricultural industry functions without operational or management restraints due to land use conflicts. It also means promoting further agricultural development where the land can support it (i.e. where unused capability exists). So the strategy is designed to promote a larger, more secure and productive agricultural industry in the Dubbo area in the long term.

Council has an important responsibility to ensure that the resources agriculture depends on remain available, and are able to be used effectively (e.g. without conflicts from other uses). Specific farm management issues Council can influence include:-

- * land use conflicts which tend to limit farming operations;
- * dogs, weeds, fire hazards;
- * uncertainty about the future use of land - speculation;
- * fragmentation of the land resource; and
- * rating policy.

Furthermore, Council is never the sole player. It can also act to involve other bodies (eg DLWC) in addressing some of the wider needs and problems of this most important local industry.

To fulfil its role Council must determine which areas of Dubbo should expect to have a long term agricultural future, then encourage and protect agricultural investment in those areas.

For the purpose of the Strategy any land capable of agricultural production is agricultural land. However, the degree to which this production can be realised also depends upon the management skill of the farmer, the quality of the land and its condition (eg contamination, land degradation) the size of the holding in relation to the land quality and the potential for the holding to be expanded.

(1) EXTENSIVE AGRICULTURE*

*Definition - Extensive Agriculture here refers to those farming activities that do not require high capability lands. It includes broadacre cropping and dryland stock grazing.

Locations	Extensive agriculture is suited to the mid catchment areas of the Macquarie and Talbragar river systems and in a more extensive form in their upper catchment areas.
Issues	<ul style="list-style-type: none"> - The size of a property in relation to its productive capacity. - The extent of land degradation or contamination. - Environmental sustainability. - Over capitalisation. - Inflated land prices due to speculation for other less productive land uses. - Excessive rating based on unrealistic valuations. - Conflicting land uses that could compromise the efficiency of farming. - Dogs, fires, weeds.

Interested Parties Landowners, NSW Ag, DCDC, NSW Farmers, DCC Environmental Services Division, DLWC, Landcare Groups, Agri-businesses, Fire Control Officers.

ACTION PLAN FOR EXTENSIVE AGRICULTURE**POLICIES:**

Encourage	<p>(1) Encourage improved information exchange between landowners and between NSW Agriculture and the industry by:-</p> <ul style="list-style-type: none"> (a) Sponsoring an annual agricultural forum on local agricultural issues, and (b) encouraging NSW Agriculture to publish an annual program of agricultural seminars for this area. <p>(2) Encourage farmers to approach Council with local problems that make farm management difficult (eg dogs, weeds, water management, land use conflicts, land degradation problems).</p> <p>(3) Minimise further speculation of non-farming development that doesn't conform to the strategy by promoting awareness of the strategies aims to financial institutions and valuers.</p> <p>(4) Educate landowners in clusters of hobby farms in agricultural areas of the responsibilities and understanding attached to living in a farming area (see Settlement: clusters).</p> <p>(5) Encourage consolidation of lots into larger holdings.</p>
Control	<p>(1) In consultation with NSW Agriculture and DLWC identify extensive agricultural areas by differential zoning in the LEP/DCP.</p> <p>(2) Protect or enlarge current holding sizes in extensive agricultural areas by:-</p>

- (a) facilitating subdivision but only for those activities that advance the objectives of the strategy; and
 - (b) permitting boundary alterations without subdivision requirements, to enable farm adjustments without creating additional allotments.
- (3) Extensive agriculture to be a use that is permitted without the need for Council consent.
 - (4) Permit dwellings only where they are ancillary to productive and sustainable agriculture and necessary for its continuation or for other non conflicting activities that are defined as appropriate to the particular district.
 - (5) Consider allowing second dwellings for a manager, worker or relative employed in the farming activity on the site where the dwelling is to be contained within the same lot as the existing dwelling, uses the same access and is attached to the main dwelling or is of transportable construction.
 - (6) Allow supporting and small scale and compatible value adding industries in extensive agricultural areas.
 - (7) Inform neighbours of applications to create a new title and/or an additional dwelling in agricultural areas.
 - (8) Prevent potentially conflicting land uses (eg residential subdivision) from locating in extensive agricultural areas.
 - (9) Policies for the clusters are to be designed to overcome conflicts with larger scale surrounding agricultural activity.
- Assist**
- (1) Resolve conflicts between land uses in crucial areas by most effective means (see clusters).
 - (2) Council's program and priorities for rural services (eg road maintenance and improvements, hazard and weed reduction and dog control) to better reflect the reasonable needs of the agricultural industry.
 - (3) Identify sites for large scale value adding industries as part of Council's urban strategy.
 - (4) Lobby for drought relief when appropriate.
 - (5) Approach DUAP and other local Councils about developing a regional policy or environmental plan to co-ordinate actions to provide a more secure environment for the agricultural industry in the Central West.

The details on intensive agriculture are not directly relevant to this district. Details can be found on pages 11 and 12 of the Rural Development Strategy.

(2) TRANSPORT

OBJECTIVE:

SAFE, EFFICIENT TRANSPORT LINKS BETWEEN DUBBO AND OTHER MAJOR CENTRES, WITH CAPACITY FOR FUTURE EXPANSION

The Talbragar District incorporates the Dunedoo Road and rail link. Both are considered important transport routes because of the potential for a relatively direct link to the port and industries of Newcastle (especially over Sydney) and the North Coast of NSW. So in the management of this District the protection of these routes will be crucial.

POSSIBLE BENEFITS

- * Safeguards Dubbo's role as a transport hub in the state and national systems
- * Ensures road and rail operations remain free of conflicts or pressure from other land uses.
- * Anticipates future growth in use of road and rail through Dubbo.

APPROACH

Council's transport corridor strategy for road and rail seeks to protect the existing main corridors from local development pressures which could impair their future operation.

In the case of the major road system this means ensuring there is not an incremental proliferation of access points which increase hazards and lead to further speed limited sections, and ensuring the road reservation and geometry is adequate to accommodate future expansion.

In the case of rail it means ensuring there is not a proliferation of crossing points.

The retention for future use of established publicly owned local lines is an important matter of Council's policy, particularly as a preferred means of freight movement over road.

(1) ROAD CORRIDOR PROTECTION**Relevant Roads**

Highways (ie Mitchell Highway, Newell Highway). Strategic Roads (Dunedoo Road, Mendooran Road, Obley Road) (outside the Urban LEP).

Issues

Extent of speed limitation resulting from increasing numbers of direct accesses
Road geometry, construction standards and maintenance aspects where they
affect safety and efficiency
Passing opportunities and potential need for medians between opposing traffic
on highways.
Future upgrading of existing routes (eg Mendooran Road as alternative to
Newell, Dunedoo Road as Newcastle link)

Interested Parties

RTA, DCDC, DCC Technical Services Division, Newell Highway committee, the Transport Industry, the Tourism Industry, landowners affected, NRMA and the Orana Regional Development Board, State and Federal Transport Ministers, Orana Group of Councils.

ACTION PLAN FOR ROAD CORRIDOR PROTECTION**POLICIES:**

- | | |
|------------------|--|
| Encourage | (1) Recognition of the importance of these links to Dubbo's economy by interested parties and State and Federal Government Departments. |
| | (2) Encourage the RTA to adopt a consistent approach to access off all highways around Dubbo. |
| | (3) Encourage the RTA to consider future provision for a four (4) lane separated corridor for the highways in the vicinity of Dubbo. |
| Control | (1) No additional private accesses to be created directly off the highways or Dunedoo Road. |
| | (2) Maintain an interim building setback of 100m to accommodate potential road widening along the highway (pending availability of long term highway development concepts from the RTA). |
| | (3) No additional public accesses to be created directly off the Highways or Dunedoo Road without RTA and Council approval. |
| | (4) Access to land fronting the Obley and Mendooran Roads to be provided from secondary roads wherever possible. |
| | (5) Prevent new signage on private land along the Highways and the Dunedoo, Mendooran and Obley Roads other than those relating to the sites themselves or to local scientific, cultural, historic or scenic interest and that they be subject to consent. (ie. as per cl 24 of Urban LEP) |
| Assist | (1) Council's Technical Services Division to consult with the RTA on what assistance is feasible for Council to provide in formulating a long term highway development concept. |
| | (2) Promote development of a regional policy on transport to the Orana Regional Development Board and Orana Group of Councils. |

(2) RAIL CORRIDOR PROTECTION**Relevant Lines**

All existing lines (ie Main Western Line, Merrygoen, Molong and Coonamble Rail Lines)

Issues

Existing rail infrastructure is an expensive and valuable asset. Government policy has neglected rail in past decades, in favour of road, for freight movement.

Role of rail can be expected to strengthen in the long term.

Passenger and freight rail functions are both important to Dubbo Cities status and promotion.

Interested**Parties**

SRA, State and Federal Transport Ministers, DCDC, DCC Technical Services Division, National Rail Corporation, RTA, Dubbo Coachline, Fletchers International, Walkers Transport, Orana Regional Development Board (ORDB), Orana Group of Council's.

ACTION PLAN FOR RAIL CORRIDOR PROTECTION**POLICIES:****Encourage**

- (1) Increased use of rail for freight by encouraging DCDC and ORDB to lobby for this to become State and Federal Policy
- (2) Security of XPT service to Dubbo by encouraging DCDC and ORDB to lobby for this to become State Policy
- (3) Retention of disused and seasonal lines
- (4) Continued support and action on the Dubbo 21 Policy relating to the relocation of Dubbo rail operations yard to an efficient site and retention of threatened lines, as already adopted by Council.
- (5) Encourage recognition of the importance of the rail network to Dubbo's economy by interested parties and State and Federal Government departments.
- (6) Encourage landowners to use a building setback of 100m to rail lines where possible, for noise mitigation.

Control

- (1) Develop regulations and development control guidelines appropriate to ensure that new development proposals do not conflict with the efficiency or safety of the rail network.

Assist

- (1) Support DCDC's pursuit for relocation of the yard and retention of threatened lines by providing technical assistance where possible.
- (2) Promote the development of a regional policy on transport to the Orana Regional Development Board and the Orana Group of Councils.

(3) TOURISM

OBJECTIVE:

AN EXPANDED RURAL BASED TOURISM* INDUSTRY IN DUBBO

There is potential to provide Bed and Breakfast style accommodation in Ballimore and off the Dunedoo Road. Similarly farm stays have potential throughout the Talbragar District. The Talbragar River and aboriginal sites along its length also constitute tourism assets. There is opportunity also for other attractions (eg bush dance, soda springs) and so the Talbragar District may be useful in achieving an expanded rural tourism industry.

POSSIBLE BENEFITS

- * Diversify local rural economic base
- * Diversify local tourism industry
- * Broaden accommodation choice in respect of costs, type, location

APPROACH

Tourism in Dubbo needs more diversity in accommodation choice and a greater range of activities for visitors, especially with the recent trend into experiential tourism.

Tourism proposals in the rural area can cause conflicts with agriculture so the Tourism aspects of the Strategy are subordinate. Tourism must be complimentary to and compatible with agriculture in the vicinity.

The Development Corporation Tourism Strategy needs to be guided and supported by Councils planning and control functions. The Council, the Corporation and the industry will need to cooperate closely to achieve this.

The rural area of Dubbo can be part of the asset base for that strategy. It provides prospects in bed and breakfast, farm-stay, as a potential base for experience or environmental tourism focussed on unique aspects of the local ecology, archaeology, history and rural lifestyle, and perhaps as a "gateway" to the Outback for the Sydney market. The strategy (and subsequent LEP) must protect the relevant assets and facilitate their development.

The Strategy recognises four (4) main opportunities to promote tourism in Dubbo's rural areas:-

- (1) Bed and Breakfast Accommodation
- (2) Rural Experience Holidays eg Farm stays
- (3) Interpretive/Educational tourism eg historic sites
- (4) Leisure Facilities

(1) BED AND BREAKFAST ACCOMMODATION*

*Definition - Small scale, personalised accommodation in houses rather than hotels/motels typically short term visits (eg overnight weekend).

Locations Major travel routes such as the Newell and Mitchell Highways and Dunedoo Road and the villages of Wongarbon and Ballimore and historic buildings or cottages.

Issues Access from the main travel routes (Highways and Dunedoo Road) and/or from the city.
Signposting
Standard of facilities (building quality, character, meals, setting etc)
Traffic noise impact on/from farm activities etc
Non conflicting land use

Interested Parties

Landowners
DCC Environmental Services Division
Tour Operators,
Visitors Information Centre,
Dubbo City Development Corporation,
NRMA
National Trust

ACTION PLAN FOR BED AND BREAKFAST**POLICIES:**

- Encourage**
- (1) DCDC and DCC to co-operate to promote community awareness of the tourist value of the rural landscape (eg through photographic and art competitions and displays)
 - (2) Encourage the Visitors Centre to collect data on tourist needs and interests (eg costs and form of accommodation, interpretive tourism for students).
 - (3) Encourage use of heritage and Council's heritage advisor in rural areas by attaching this information on 149 Certificates and rate notices for historic properties.
 - (4) Encourage the Visitors Centre to co-ordinate school visit to Western Plains Zoo with other attractions.
 - (5) Encourage the DCDC/visitors centre/tour companies to provide a local directory of accommodation, sites and attractions and tours.
 - (6) DCDC/DCC to seek grants for rural heritage development.
- Control**
- (1) Allow for tourist facilities and attractions subject to consent.
 - (2) Allow for subdivision for the purposes of tourism subject to consent and submission of a farm management tourism plan that demonstrates the compatibility of the proposal with other productive land uses.

- (3) Prepare a register of historic sites and require consent for any development thereon (including demolition).
- (4) Allow for signage conforming with the relevant standards advertising on-farm tourism on the major traffic routes and on the site and directional signage on road signs, subject to consent.
- (5) Adopt development control policies/guidelines that reflect the States' minimum standards for differing types and scales of tourist facilities and also ensure that no conflicts arise between on-farm tourism and other productive landuses.

Assist

- (1) DCDC to approach adjoining towns seeking more co-ordinated tours through the Central West and West that include Dubbo.
- (2) Identify and promote through signage a local rural tourist drive.
- (3) DCDC/DCC to consider purchase of threatened historic sites where grant funds are available.
- (4) Lobby the RTA, the Orana Regional Development Board and other Councils to identify Dubbo on signs at turnoffs outside the city onto the Newcastle Link, onto the Obley/Molong Link and onto the Old Dubbo Road.

(2) RURAL EXPERIENCE HOLIDAYS/FARMSTAYS*

*Definition - accommodation and activity packages where visitors become involved in rural activities typically over a few days.

Locations	Established farms and the villages of Wongarbon and Ballimore.
Issues	Accommodation standards and facilities. A diverse range of activities on-site and in the area (eg horse riding, fishing, bushwalking). Access Proximity to main travel routes. Directional signage Non-conflicting land use

Interested**Parties**

Landowners, DCDC, Visitors Information Centre, NSW Agriculture, NRMA, DCC Environmental Services Division.

ACTION PLAN FOR FARMSTAYS**POLICIES:**

Encourage	(1) DCDC and DCC to co-operate to promote community awareness of the tourist value of the rural landscape (eg through photographic and art competitions and displays)
	(2) Encourage the Visitors Centre to collect data on tourist needs and interests (eg costs and form of accommodation, interpretive tourism for students).
	(3) Encourage use of heritage and Council's heritage advisor in rural areas by attaching this information on 149 Certificates and rate notices for historic properties.
	(4) Encourage the Visitors Centre to co-ordinate Schools' visit to Western Plains Zoo with other attractions.
	(5) Encourage the DCDC/visitors centre/tour companies to provide a local directory of accommodation, sites and attractions and tours.
	(6) DCDC/DCC to seek grants for rural heritage development.
Control	(1) Allow for tourist facilities and attractions subject to consent.
	(2) Allow for subdivision for the purposes of tourism subject to consent and submission of a farm management tourism plan that demonstrates the compatibility of the proposal with other productive land uses.
	(3) Prepare a register of historic sites and require consent for any development thereon (including demolition).
	(4) Allow for signage conforming with the relevant standards advertising on-farm tourism on the major traffic routes and on the site and directional signage on road signs, subject to consent.
	(5) Adopt development control policies/guidelines that reflect the States' minimum standards for differing types and scales of tourist facilities

and also ensure that no conflicts arise between on-farm tourism and other productive landuses.
(6)* Require a farm management plan with applications for farm-stay operations to ensure the agricultural base - farming - is itself genuine and sustainable.

Assist

- (1) DCDC to approach adjoining towns seeking more co-ordinated tours through the Central West and West that include Dubbo.
- (2) Identify and promote through signage a local rural tourist drive.
- (3) DCDC/DCC to consider purchase of threatened historic sites where grant funds are available.
- (4) Lobby the RTA, the Orana Regional Development Board and other Councils to identify Dubbo on signs at turnoffs outside the city onto the Newcastle Link, onto the Obley/Molong Link and onto the Old Dubbo Road.

(3) INTERPRETIVE/EDUCATIONAL TOURISM*

*Definition - tourism focussed on a particular interest, eg Aboriginal Heritage, historic buildings, eco-tourism, or particular farming enterprises. It may be for day excursions or tours or involve overnight stays (eg spotighting) for students or other interested parties

Locations Aboriginal Sites - Terramungamine Reserve, Beni/Barbigal sites etc
 Historic Buildings/and Heritage Sites - eg Pioneer Cemetery
 Eco tourism - Little River Area, Wongarbon and Coolbaggie Nature Reserves,
 State Forests, Macquarie River, Wambangalang Field Studies Centre, Old
 Harbour etc
 Farming, agro-forestry areas

Issues Points of interest
 Access
 Protection and Management of the asset
 Interpretation eg documentation, signage, tour guides
 Non conflicting landuse

Interested Parties Landowners, Aboriginal Groups, Heritage Advisor and Committees, Dubbo Museum, NPWS, Landcare Groups, NSW Ag, DCC Parks and Landcare, Western Plains Zoo, DLWC, National Trust

ACTION PLAN FOR INTERPRETIVE TOURISM

- Encourage**
- (1) DCDC and DCC to co-operate to promote community awareness of the tourist value of the rural landscape (eg through photographic and art competitions and displays)
 - (2) Encourage the Visitors Centre to collect data on tourist needs and interests (eg costs and form of accommodation, interpretive tourism for students).
 - (3) Encourage use of heritage and Council's heritage advisor in rural areas by attaching this information on 149 Certificates and rate notices for historic properties.
 - (4) Encourage the Visitors Centre to co-ordinate school visit to Western Plains Zoo with other attractions.
 - (5) Encourage the DCDC/visitors centre/tour companies to provide a local directory of accommodation, sites and attractions and tours.
 - (6) DCDC/DCC to seek grants for rural heritage development.
- Control**
- (1) Allow for tourist facilities and attractions subject to consent.
 - (2) Allow for subdivision for the purposes of tourism subject to consent and submission of a farm management tourism plan that demonstrates the compatibility of the proposal with other productive land uses.
 - (3) Prepare a register of historic sites and require consent for any development thereon (including demolition).
 - (4) Allow for signage conforming with the relevant standards advertising on-farm tourism on the major traffic routes and on the site and directional signage on road signs, subject to consent.

- (5) Adopt development control policies/guidelines that reflect the States' minimum standards for differing types and scales of tourist facilities and also ensure that no conflicts arise between on-farm tourism and other productive landuses.
- (6)* Allow for one caretakers residence where supervision and/or security is necessary (eg for Aboriginal artefacts)
- Assist**
- (1) DCDC to approach adjoining towns seeking more co-ordinated tours through the Central West and West that include Dubbo.
- (2) Identify and promote through signage a local rural tourist drive.
- (3) DCDC/DCC to consider purchase of threatened historic sites where grant funds are available.
- (4) Lobby the RTA, the Orana Regional Development Board and other Councils to identify Dubbo on signs at turnoffs outside the city onto the Newcastle Link, onto the Obley/Molong Link and onto the Old Dubbo Road.
- (5)* Consider providing support facilities where appropriate for educational based tourism (eg interpretation signs, information).

The details on leisure facilities are not directly relevant to this district details can be found on pages 23 and 24 of the Rural Development Strategy.

(4) FORESTRY

OBJECTIVE:

EXPANSION OF THE DUBBO AREA TIMBER INDUSTRY

The Talbragar District includes Beni State and Beni National Forests. Beni State Forest is an important source of White Cypress which has been identified as a potential growth industry in Dubbo. The Yarandury Forest in Wellington also abuts the District. All of these forests may need to be used to put the objective of expanding the local timber industry into action in Dubbo.

POSSIBLE BENEFITS

- * Economic benefit gained from land unlikely to support other land uses in the long term.
- * Development of a white cypress industry which, with existing ironbark industry, could help satisfy unmet demand for both timbers.
- * Expansion of existing timber milling in Dubbo
- * Security of a long term investment in Dubbo's rural area.
- * Agri-/Eco tourism and recreational potential of forestry areas
- * Further employment opportunities in forestry and associated industries.
- * Assists combating soil, water and effluent problems and provide habitats.

APPROACH

A strategy for expansion of forestry in the Dubbo area based on the unsatisfied white cypress market is not one which can be driven by Dubbo City Council, but if there is a prospect of achieving a stronger forestry industry in the area Council will be involved through its environmental and development control roles. It can also initiate and facilitate interest through the DCDC.

Council's Strategic Plan identifies areas which could be relevant to expanding the timber industry. The industry, through Dubbo City Development Corporation, should be encouraged to re-examine its prospects.

Private land owners may be found who could be interested in plantation based supply. At present, promotion of the unique qualities of white cypress is pointless due to the shortage. More aggressive growing and marketing by private enterprise based in Dubbo and with commitment for long term investment may create a wider market for the region.

*Definition - the cultivation of trees for the purpose of cropping to supply timber products

Locations There may be scope for private expansion of the existing State Forests - ie Goonoo and Beni State Forests. Beni National Forest, the lands adjoining Yarindury (across Wellington L.G.A Boundary) and the Mogo Forest Area (south west of Dubbo) may warrant investigation. There may also be scope for expand the range of species grown. There is private forestry potential in the long term in all districts, particularly in conjunction with agriculture.

Issues Extent of existing timber resources of useful species (White Cypress, Iron Bark) and of suitable land
Ease of access
Management for environmentally sustainable forestry
Fire management

Interested Parties State Forests, NSW Ag, NPWS, DLWC (Soils), DCDC, Milling Industries, landowners, firewood suppliers, transport operators, Fire Control Officers.

ACTION PLAN FOR EXPANSION OF FORESTRY

POLICIES

- Encourage**
- (1) DCDC to encourage State Forests, land owners, entrepreneurs to expand existing forests or introduce new commercial forestry
 - (2) Advise landowners in appropriate areas of multi-functional role/benefits of forestry. (eg can complement grazing, catchment management, habitat protection/ecotourism ventures)
 - (3) Encourage landowners adjoining existing productive forests to plant similar species and facilitate expansion in the long term or private agroforestry
 - (4) Encourage State Forests to better promote the benefits of forestry.
 - (5) Encourage landowners to use millable timbers when planting windbreaks and other stands where appropriate.
- Control**
- (1) New private forestry to be permitted with consent, subject to capability and environmental sustainability.
 - (2) Timber milling and other relevant value-adding industries to be permitted with consent where conflicts can be resolved.
 - (3) Identify and protect existing publicly owned forests in the LEP/DCP.
 - (4) Develop guidelines for and require Forest Management Plans for consistent assessment for new private forestry proposals.
- Assist**
- (1) Council road works program to reflect the economic needs of the rural area.
 - (2) Council to assist DCDC to promote:-
 - (a) the multifunctional benefits for forestry (eg complement grazing, catchment management, tourism etc)
 - (b) landowners to use millable timbers for windbreaks or where adjoining existing forests to plant species to facilitate expansion of the forest or private agroforestry

by inclusion of promotional material in rate notices, and obtaining a forestry capability map of suitable areas.

(5) MINING

OBJECTIVE:

ALLOW MINING AND OTHER EXTRACTIVE INDUSTRIES WHERE CONSISTENT WITH ENVIRONMENTAL OBJECTIVES

Although mining has not been identified as a major industry in Dubbo, the potential for sand or gravel extraction or for exploitation of the Soda Springs of Ballimore should be noted.

POSSIBLE BENEFITS

- * Allows for future diversification of local rural economic base
- * Supply of raw materials for local value adding industries
- * Diversification of employment base.

APPROACH

Mining activity and prospects in the Dubbo rural area are modest and it is proposed that the strategy for these consist of three (3) lines of approach:

- (a) facilitate mining activity where consistent with other objectives of the strategy.
- (b) require sound environmental management of existing and abandoned sites
- (c) ensure compatibility of subsequent development in the vicinity that may affect or be affected by mining activity.

Therefore Dubbo Councils' role will be that of facilitator, both through its Rural Strategy and ultimately its Rural LEP, with the main initiative needing to come from the industry, the Department of Mineral Resources, and possibly the DCDC.

*Definition - non renewable minerals and other materials that are at surface or sub surface level for use in local concreting, brick making and paving, ceramics, road bases, gardening and pottery industries eg River sands, gravels and clays, minerals, mineral springs.

Locations Riverbeds and floodplains for sands and gravels, upper catchment areas for bush rock, clays - locally unknown, Ballimore spring, Eulomogo and Brocklehurst hard rock quarries.

Issues retrievable quantities of materials accessible
site undeveloped
local "value adding" opportunities for further processing
rehabilitation to same or better site conditions

Interested Parties
Landowners
DLWC (Soils)
Department of Mineral Resources Industries
DLWC (Water)
EPA
NPWS
DCC Environmental Services Division

ACTION PLAN FOR MINING AND EXTRACTIVE INDUSTRIES

POLICIES:

- Control**
- (1) Mines and quarries (extractive industries) to be permissible with consent subject to environmental constraints and compatibility with existing development.
 - (2) When Council is notified of exploration permits, advise landowners of the process and need to contact the Council and the Department of Mineral Resources before preparing a Development Application
 - (3) Up to date plans of existing and abandoned mining and exploration permit areas to be kept at Council office, to help ensure all activities are both legal and well managed.
 - (4) Locate only non-conflicting development in the vicinity of existing productive extraction areas.
 - (5) On-site value-adding beyond that defined as mining and quarrying to be permitted subject to further consent.
- Assist**
- (1) Encourage the Department of Mineral Resources, through the DCDC, to prepare a more detailed survey of sites of mining potential by providing a base map with all known and abandoned mines and quarries.

(6) RECREATION

OBJECTIVE:

USE THE RECREATION POTENTIAL OF THE RURAL AREA

There are recreational opportunities associated with Beni National Forest, particularly due to its proximity to the City for camping, walking, orienteering, trail bike riding and so forth. Council reserves along the River and in the village of Ballimore should also be used to make the Talbragar District important in providing rural recreational opportunities.

POSSIBLE BENEFITS

- * Wider range of activities available to visitors which would complement the tourism industry.
- * Wider range of recreation opportunities for the Dubbo community
- * Promote wider community appreciation of the rural area.

APPROACH

Recreation proposals in the rural area are principally valued as an adjunct to tourism, providing opportunities to add interesting activities to rural based tourism. They should be subject to being compatible with agriculture and he vicinity and careful management.

A recreational lands strategy for the Dubbo rural area should reflect such issues as:-

- * the need to widen the range of recreational activities available to visitors, especially of an exploratory or non commercial nature, to encourage longer stays.
- * the lack of state recreation or national park reserves within or close to Dubbo.
- * the resulting relative lack of opportunity and facilities for informal outdoor recreation such as walking, riding, camping, boating.
- * the prospects for more recreational use of forest areas, the river system and other scenic assets as adjuncts to rural based tourism ventures.

Council's strategy should be based on the findings of its recreation and leisure needs study. Council could function (depending on the case) as provider or facilitator (eg in the case of privately held land to which public access is desirable), or as a regulator (eg to ensure compatibility with other objectives).

The strategy identifies opportunities in the rural area which appear relevant to meeting these various needs, and which may need to be reflected in the Rural LEP.

*Definition - this includes all recreation that uses the rural waterways such as fishing, canoeing, power boating and swimming as well as land based activities such as bushwalking, horse riding, orienteering, picnicking and cycling.

Locations Primarily the Macquarie River but also includes the major tributaries such as the Talbragar and Little Rivers, Coolbaggie and Wambalang Creek, State Forests, Nature Reserves and village parks. Council reserves and crown lands in the Little River Area and Sappa Bulga areas, TSRs in scenic areas, disused railway lines (as appropriate and where publicly owned).

Issues Vehicle accessibility
Support Facilities
Scenic Value or features of interest
Environmental Management Plans (sustainability, habitat resilience, water quality, rehabilitation)
Risk and Fire Hazard Management
Compatibility with adjoining land uses

Interested Parties Land Owners, DCC Technical Services Division, DCC Parks and Landcare Division, RTA, DLWC (Water), SRA, NPWS, DLWC (Soils), relevant recreation/sporting groups, DCDC and Tourism Strategy, Visitors Centre, Recreation Study Consultants; TCM groups, NSW Ag, State Forests, Landcare Groups, Fire Control Officers, DCC Community Services Division

ACTION PLAN FOR RURAL RECREATION

POLICIES:

- Encourage**
- (1) Advise the community of appropriate existing accessible public reserves.
 - (2) Encourage landowners to approach Council with problems associated with public access to rural recreational sites.
 - (3) Encourage landowners to consult with Council on the development potential of sites of recreational value (possibly in conjunction with tourism proposals).
 - (4) DCC to encourage State Forests to convert Beni National Forest to a State Recreation Area.
- Control**
- (1) Protect existing sites from inappropriate development and recognise potential recreation sites in the LEP/DCP.
 - (2) Permit commercial recreational use and associated development, subject to consent and appropriate management plans.
 - (3) Develop guidelines for recreation proposals to ensure compatibility with adjoining land uses.
- Assist**
- (1) Council may prepare management plans as appropriate and at its discretion for specific proposals, at the cost of the developer.
 - (2) Direct developers to use DCC as a facilitator between landowners and user groups where necessary.
 - (3) Provide for pre-development application discussion of recreation proposals between developers and Council.
 - (4) Consider provision of Council assistance in seeking grants, where appropriate.

- (5) Provision and maintenance of safe legal access to recreational sites.
- (6) Consider provision of support facilities on public reserves of recreational value (eg toilets, boat ramps, directional signage, BBQ facilities, litter bins) and program them as appropriate.
Consider acquiring sites of important recreational value. (eg potential lookouts)
- (8) Consider assisting landowners adjoining public reserves to provide fencing where it is necessary.
- (9) Consider forming connecting riding trails and bush walks within Council recreational areas where appropriate and subject to managing any potential conflict with other land uses.
- (10) Consider pursuing grants for development of rural recreation facilities
- (11) Consider simplifying boundaries of Crown Reserves through negotiation and exchange of land where necessary and practical.
- (12) Protect the quality of Waterways to ensure safe use and a plentiful supply of native freshwater fish (see waterways).
- (13) DCC to consider acquisition of private timbered lands for public recreation purposes (eg. Little River Area) if clearing is refused and where amenable to the owners.

(7) SETTLEMENT**OBJECTIVE:****DIRECT RURAL SETTLEMENT PRESSURES INTO THE RURAL VILLAGES AND SELECTED AREAS OF EXISTING FRAGMENTATION**

There is relatively little fragmentation of land in the Talbragar District. To achieve the other economically beneficial objectives in this district it is crucial that any further settlement pressure in the Talbragar area be directed to the village of Ballimore or into the expanded urban area.

POSSIBLE BENEFITS

- * Supports Urban Area strategies of continuing to focus most residential development into the Central District and the area of the Urban LEP.
- * Allows further settlement to be directed into the most suitable locations with minimum damage to other rural strategy objectives.
- * Enables Council to service a predictable growth pattern and so protects Council from random demands for services.
- * Enables more effective response to the amenity expectations of residents outside the urban area.
- * Enables more effective use of those areas already lost from effective rural production. * Encourages a sense of community in the existing hobby farm clusters.
- * Minimises further losses of rural land from efficient production
- * Encourages investment in farming enterprise through a more secure operating environment.
- * Enables containment of the spread of conflict between agricultural activities and other land uses.
- * Facilitates efficient farm management as to scale, hours, use of machinery etc

APPROACH

The strategy for guiding rural settlement pressures is based on a need to resolve the small lot issue and to ensure adequate buffering to protect other more productive land uses from conflicts. To this end Council supports the following principles:-

- (a) The expanded Dubbo urban area (ie Central District) is to be the focus of most residential development in the future.
- (b) Provision of a range of lifestyles in appropriate areas within the Central District.
- (c) The fragmented areas of the Central District provide an opportunity for consolidation by resubdivision.
- (d) Strengthening the villages of Wongarbon, Ballimore and Eumungerie and encourage recognition that they provide a lifestyle option.
- (e) Consolidation of existing clusters of hobby farms in the rural area where agricultural conflicts would not be increased.
- (f) Minimising impacts on other economic opportunities in the rural area.

There are three (3) main opportunities to promote efficient settlement that should not unduly compromise productive land uses.

- (1) Central District

-
- (2) Village Consolidation
 - (3) Cluster Consolidation

(2) VILLAGES

OBJECTIVES:

PROTECT VILLAGE COMMUNITIES AS EFFECTIVE ALTERNATIVES TO URBAN LIVING

Locations existing villages of Wongarbron, Ballimore, Eumungerie

Issues village character
capacity of each village to absorb further development
required services, their feasibility and impact
management of village/rural transition area
flooding and drainage
waste management

Interested Parties Villagers and businesses, DCC Technical Services Division, DCC Parks and Landcare Division, DCC Community Services Division, Department of Education, Fire Control Officers.

ACTION PLAN FOR VILLAGES

A structure plan and set of policies are to be prepared in respect of each of the three villages, (in consultation with the villagers) and proposed as DCP's following preparation of the Rural LEP. The plan and policies will be driven by the following principles:-

- (1) **Recognise and protect the distinctive lifestyle and character of each village.**
 - * compatible development of existing vacant lots within the villages;
 - * identify and protect the attractive elements of village character related to streetscape, density, scale;
 - * permit further business, tourism, recreational and infill development within each village to the extent compatible with the village character and capacity;
 - * provide improvements to the village streetscape by street trees and furniture where appropriate;
 - * enhance recreation opportunities for residents where necessary.
- (2) **Establish the capacity of each village to absorb further development.**
 - * ensure the limits of development of the village are clearly defined and contained so as not to sprawl across major roads, railways or natural barriers;
 - * resolve flooding, stormwater drainage and waste management issues.

- (3) **Establish which services are necessary, feasible and have acceptable impacts.**
- * only provide services that are consistent with the character of the village and desired by the community.
- (4) **Manage potential conflicts between village amenity and rural producers.**
- * Buffer the village area from agricultural operations and noise and any odour, dust producing developments through separation of rural and residential uses.

Notes on the distinctive needs and character of each of the villages of Wongarboon, Ballimore and Eumungerie as well as structure plans were gleaned from the meetings.

These notes are attached as Appendix 8 of the Rural Areas Development Strategy.

The details of the "clusters" and the Central District are not directly relevant to this district. Details can be found on pages 35 and 36 and 53 -57 of the Rural Development Strategy.

ENVIRONMENTAL OBJECTIVES

(1) WATERWAYS

OBJECTIVE:

SAFE, SUSTAINABLE AND MULTIFUNCTIONAL RIVERINE ENVIRONMENTS.

The Talbragar District comprises much of the cleared parts for the local Talbargar River catchment area. So the district needs to be managed carefully to prevent further degradation of this Waterway.

Locations Macquarie, Talbragar and Little Rivers.

Issues Pollution and degradation of rivers and tributaries resulting from:-

- * Silting
- * Chemical residues
- * Human and animal wastes
- * Inadequate natural flushing, (evaporation, drought)
- * Reduced runoff
- * Dams
- * Algae
- * Flooding
- * Recreational use
- * European Carp
- * Exotic vegetation/trees

Interested

Parties

Landowners, DLWC (Water), EPA, CMC's, Landcare Groups, DLWC (Soils), MSB and other user groups, Macquarie River Advisory Council, DCC Environmental Services, Parks and Landcare and Technical Services Divisions, Department of Fisheries.

ACTION PLAN FOR WATERWAYS

POLICIES:

- Inform**
- (1) Inform the community of:-
 - (a) typical water quality problems eg agricultural chemicals, inappropriate farm practices, wastes, contaminated lands, erosion, algae, inadequate water flow, European Carp, nutrients;
 - (b) water quantity problems eg dams, bores, drought, flood, evaporation; and
 - (c) the economic impacts of water problems, eg lost production, remedial costs
 through information packages attached to zoning certificates and/or rate notices or DA's and displays in Council's foyer.
 - (2) Promote good practice in Riparian corridor management by encouraging farmers to become involved in landcare groups and the

formulation of stream management plans, to seek DLWC grants for fencing or revegetation where appropriate or necessary, and to consult with NSW Agriculture and DLWC on good farming practices.

- | | | |
|----------------|-----|---|
| Control | (1) | DLWC and Council to identify riparian corridors and promote separate management of them through the LEP/DCP. |
| | (2) | Require consent for all development within the riparian corridor. |
| | (3) | Require a management plan to be submitted with applications for new development in the riparian corridor indicating appropriate measures for erosion control, habitat protection, pollution control and protection of channel form. |
| | (4) | No habitable buildings, septic tanks or other human waste treatment to be permitted in the riparian corridor. |
| Assist | (1) | Council involvement in local landcare groups and phosphorus action campaigns through MEH. |
| | (2) | DCC Environmental Services Division, through the MEH to investigate all notified problems and determine appropriate action. |
| | (3) | DCC Parks and Landcare to provide trees for revegetation of cleared Riparian Corridors where requested by landowners and considered appropriate. |
| | (4) | DCC Technical Services in co-operation with the Department of Fisheries to continue restocking the Macquarie with native fish. |
| | (5) | DCC Technical Services to prepare and use urban stormwater runoff plans to ensure runoff is of an acceptable quality. |
| | (6) | DCDC to investigate export potential of European Carp or processing for agricultural use. |
| | (7) | DCC Environmental Services Division to identify site specific sources of water quality and quantity issues by the implementation of joint monitoring programs with the DLWC (Water). |

Ambagogal
 Mogingully Creek
 Tray Creek
 DUBBO LANDCARE GROUP

(2) AQUIFERS**OBJECTIVE:****STABILISE WATER LEVELS AND WATER QUALITY IN THE AQUIFER.**

Parts of the Talbragar District ultimately drain into Dubbo's ground water system. So runoff quality and bore numbers and any other measures to protect groundwater quality are important issues in the Talbragar District.

Locations Known aquifers and their recharge areas as defined by DLWC.

Issues Health implications of contamination, reliability of information and adverse effects on aquifers as a consequence of:-

- * Subsurface geology,
- * land uses in recharge areas,
- * water tables,
- * number and location of bores,
- * DLWC licensing policy,
- * unregulated and illegal water extraction,
- * pollution,
- * surface runoff patterns,

Interested**Parties**

DCC Environmental Services and Technical Services Divisions, landowners, DLWC (Water), EPA, Dept of Health, NSW Ag, DLWC (Soils), CMC's.

ACTION PLAN FOR PROTECTION OF AQUIFERS**POLICIES:**

- Inform**
- (1) DLWC to inform Council of all existing bores and their status.
 - (2) Council to promote community awareness of:-
 - (a) the need for an unpolluted and reliable groundwater supply (eg for agricultural productivity and city water supply);
 - (b) sources of groundwater pollution (eg pesticides, herbicides, fertilisers, erosion, and flooding, animal wastes, contaminated lands); and
 - (c) the impacts of bores in recharge areas on groundwater levels through information packages, rate notices, 149's, displays in foyer etc.
 - (3) Advise landowners of the potential for prosecution of polluters or unlicensed use of water.
- Control**
- (1) DLWC and Council to identify aquifers and recharge areas in the LEP/DCP.
 - (2) Require aerobic septic disposal systems for all new residences and industries in recharge areas.

- (3) Require consent for intensive agricultural activities subject to property management plans and details of satisfactory waste disposal and runoff management.
 - (4) Require consent and management plans to control wastes and chemicals from other potentially polluting developments (eg including all designated developments).
 - (5) Where appropriate, Council to require designated developments to commission an independent system to annually monitor continued compliance with conditions of consent. Failure to meet minimum standards may result in a requirement to cease operations.
- Assist
- (1) Consider incentives to relocate potential polluters to new sites away from the recharge area in conjunction with the DCDC, EPA and DLWC.
 - (2) Evolve monitoring process/database in co-operation with EPA, DLWC and Dept of Health.

(3) FLOODING**OBJECTIVE:****MANAGE DUBBO'S FLOODPLAIN TO MINIMISE THE DAMAGE OF FLOODING.**

Much land in the vicinity of the Talbragar River has already been identified as flood liable. So, the Objective and Action Plan relating to Floodplain/Floodway management is particularly relevant to this district.

Locations Principally the Macquarie and Talbragar River and corridors and Castlereagh River Catchment area and the villages of Eumungerie, Ballimore and Wongarbon but also any other rural locations that have potential for flooding.

Issues Matters of relevance include:-

- * Identification and management of the Floodplain (including Floodway and Flood fringe) and the 1 in 100 year flood level,
- * access,
- * new and existing development in the floodplain,
- * relative hazard for differing land uses.

Interested**Parties**

Landowners, DLWC (Water), EPA, Dept of Health, DCC Environmental Services and Technical Services Divisions, Floodplain Management Committee, SES Controller.

ACTION PLAN FOR FLOODING**POLICIES:**

- Inform**
- (1) Section 149/Zoning Certificates should inform landowners in the floodplain of a potential flood hazard and that they should seek independent advice for their site
 - (2) Promote relocation of habitable structures from within the floodway to flood free areas.
 - (3) Discourage new development in the flood fringe area.
- Control**
- (1) Define the term floodplain, floodway and flood fringe in the LEP/DCP.
 - (2) DLWC and Council to determine an indicative 1 in 100 year floodline and identify it on the LEP/DCP.
 - (3) Prohibit new habitable buildings or extensions to existing habitable buildings in the floodway.
 - (4) Dwellings in the flood fringe in the villages to be subject to elevation of the floor levels at least 500mm above an agreed upon 1 in 100 year flood level.
 - (5) Dwellings within the 1 in 100 year flood areas to be prohibited unless no other alternative exists. Where permitted floor levels are to be at least 500mm above the 1 in 100 year flood level.

- (6) Require building approval for all other structures and works (as defined in the Act) that may affect flood patterns in the floodway.
- (7) Require flood free access within the site to new developments subject to there being no other negative impacts on flood patterns.
- (8) No uncontrolled fill in the floodway or floodplain
- (9) Council to consider the potential impacts of global warming, increased development, urbanisation and clearing when determining a flood standard/building standard in subsequent reviews of the rural LEP.

Assist

- (1) Council's Technical Service Division to investigate the need for flood mitigation measures in the villages (eg retaining basin, levees) and prepare recommendations for Council.
- (2) Council in its capacity as representative on the floodplain management committee to assist the SES.
- (3) Council to assist community in its executive role in the local emergency management committee.
- (4) Install flood level markers in villages and residential clusters and road crossings where appropriate
- (5) Where requested and available provide information to landowners in support of applications to the State Bank for flood proofing of existing developments in the floodplain.
- (6) Liaise with the Bureau of Meteorology and DWR where appropriate to improve the flood warning system.

(4) EROSION**OBJECTIVE:****PREVENT THE SPREAD OF EROSION AND REMEDY EXISTING AREAS.**

The Talbragar District like all of the other districts is affected by erosion. This is costly not just in lost production potential but in remedial work. So Council should aim to prevent further spread of the problem.

Locations Principally the drainage systems, cleared lands and class VII and VIII capability lands. All other areas are susceptible.

Issues Effectiveness of SEPP 46 and events and practices that may result in erosion:

- * Drought,
- * flood,
- * clearing,
- * farming practices,
- * riparian management.
- * soil depletion and siltation

Interested Parties

Landowners, Landcare Groups, DLWC, NSW Agriculture, NSW Farmers, DCC, Local Schools, NPWS.

ACTION PLAN FOR EROSION**POLICIES:**

- Inform**
- (1) Obtain the assistance of DLWC and NSW Agriculture to identify and inform the community on:-
 - (a) the causes of erosion (eg surface clearing, inappropriate cropping, overstocking, lack of windbreaks, poor drainage control);
 - (b) the impact of erosion (eg decreased agricultural productivity, devaluation of land, pollution, restorative costs, loss of habitats); and
 - (c) the solutions to erosion (eg tree planting, sustainable farming techniques, riparian management)
- by providing information with 149 Certificates, rate notices, displays in Council's foyer and encouraging landowners to seek further advice form DLWC.
- Control**
- (1) DLWC and Council to identify susceptible sites such as drainage systems and class VII and VIII lands on the LEP/DCP and update the Strategy as necessary.
 - (2) DCC to support implementation of SEPP No. 46 by DLWC and NPWS.
 - (3) Require consent and erosion control plans for any "work" (as defined in the Act) likely to cause erosion.

- (4) Any further development of susceptible sites to be conditional on rehabilitation by the developer.
- (5) Farm management plans where they are required (see Agriculture) should include provisions on contour ploughing/banks, and other sustainable farming techniques for erosion control.
- Assist**
- (1) DCC Technical Services and Parks and Landcare Division to lead by example in remedying erosion and limiting ground cover removal along road reserves through roadside management strategies.
- (2) Council support of and involvement in landcare groups, through Director Parks and Landcare.
- (3) DCC Technical Services Division to consider practical assistance to landowners (machinery, expertise) when approached.
- (4) DCC Technical Services and Parks and Landcare Division to rehabilitate existing disturbed sites that are Council owned or controlled (eg old quarries).
- (5) DCC, through MEH, to liaise with DLWC and NPWS to ensure Council awareness of the operation of SEPP No. 46 and DLWC and NPWS's monitoring of clearing in the Dubbo area.

(5) DRYLAND SALINITY**OBJECTIVE****PREVENT THE SPREAD OF DRYLAND SALINITY AND REMEDY EXISTING AREAS.**

The Talbragar District, to the south of the Dunedoo Road around Barbigal is seriously affected by Dryland Salinity. This area also constitutes an important agricultural area so the objective aimed at controlling salinity is particularly relevant to this district.

- Locations** Principally the existing surface outbreaks of salinity as identified by DLWC on their maps. Other areas are susceptible.
- Issues** Effectiveness of SEPP No. 46 and other matters which may effect or promote salinity:-
- * Clearing,
 - * geology,
 - * water tables,
 - * farming practices.

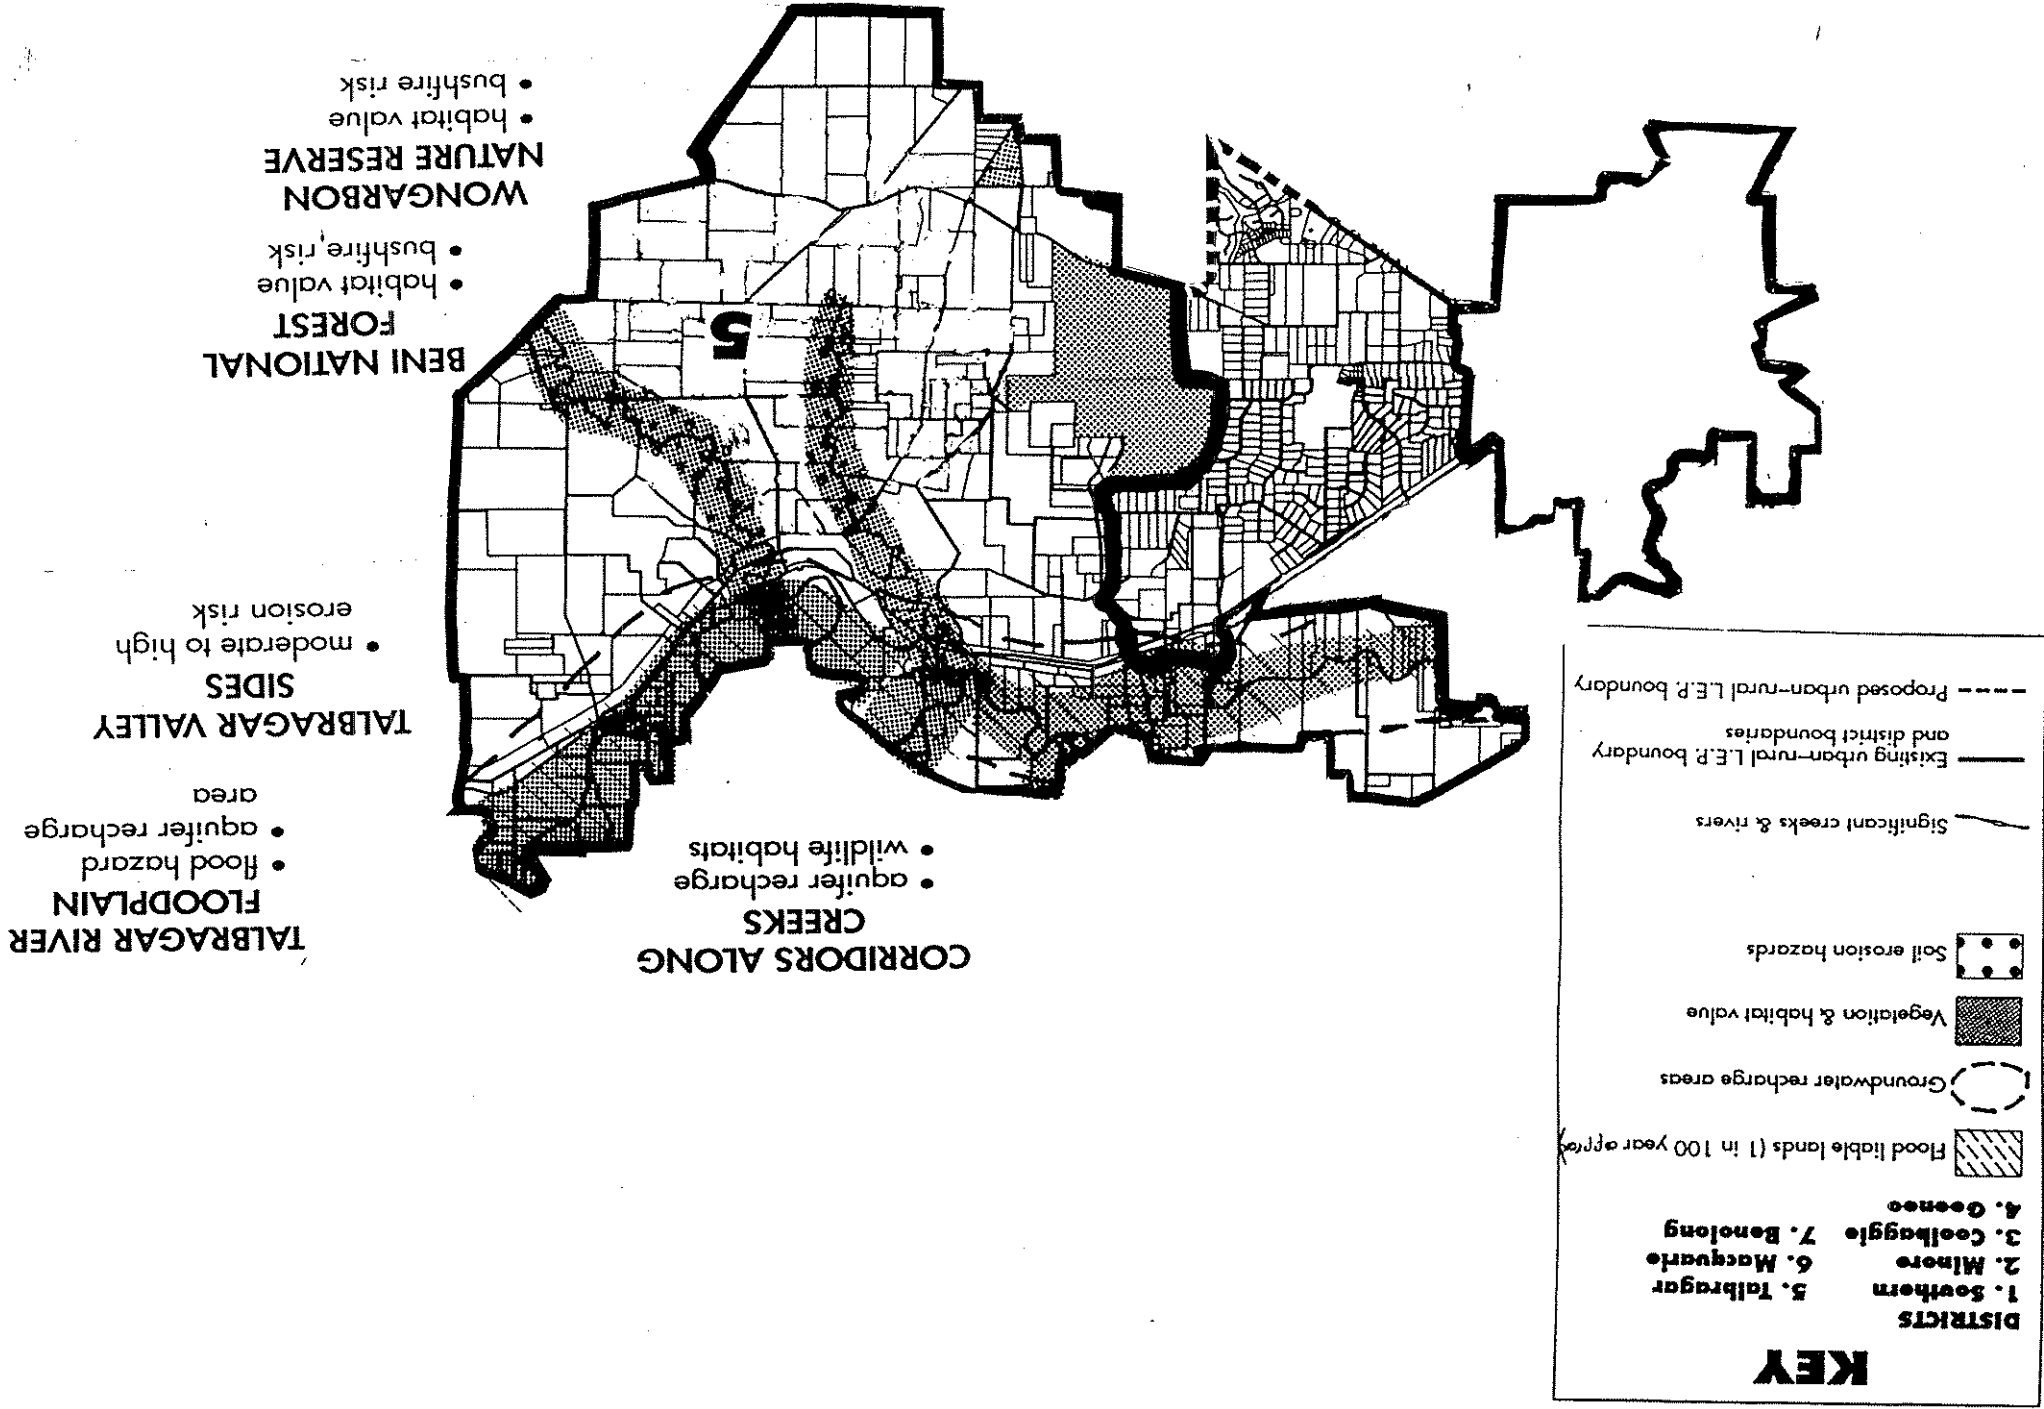

Interested Parties

Landowners, Landcare Groups, DLWC, NSW Ag, NSW Farmers, Murray Darling Basin Commission, local schools and NPWS

ACTION PLAN FOR SALINITY**POLICIES:**

- Inform** (1) Obtain the assistance of DLWC to identify and inform the community on:-
- (a) the causes of Dryland Salinity (eg geology, clearing and rising water tables);
 - (b) the impacts of Dryland Salinity (eg reduced agricultural productivity, impeded natural plant growth, devalues land, loss of habitats, restorative costs) and;
 - (c) solutions to Dryland Salinity (eg reafforestation and lowering of water tables)
- by providing information with 149 Certificates, Rate Notices, displays in Council's foyer and encouraging landowners to seek further advice from DLWC and NSW Agriculture.
- Control** (1) DLWC and Council to identify affected and susceptible sites separately in the LEP/DCP and update the Strategy as necessary.
- (2) DCC to support implementation of SEPP No. 46 by DLWC and NPWS.
- (3) Farm management plans, where they are required (see Agriculture), should include provisions for sustainable farming techniques to prevent salinity.

- (4) Any further development of susceptible sites to be conditional on rehabilitation by the developer.
 - (5) Require consent for any "works" likely to cause the water table to rise.
- Assist**
- (1) Council, through MEH and when approached by landowners regarding a new salinity problem to provide a referral service to the relevant landcare co-ordinator.
 - (2) Council to consider providing salt resistant trees and shrubs and planting advice to landowners and Landcare groups when approached.
 - (3) Support landcare group applications for SALT-ACTION funding through DLWC
 - (4) Commence a remedial program (eg planting salt resistant trees and shrubs) on all Council controlled land affected by Dryland Salinity.
 - (5) DCC through MEH to liaise with DLWC and NPWS to ensure Council awareness of the operation of SEPP No. 46 and the DLWC and NPWS's monitoring of clearing in the Dubbo area.
- (6) *Habitat Protection is important in the wider picture but is not the focus for future management of this district. Details can be found on pages 49 and 50 of the Rural Development Strategy.*
- (7) *Contaminated Lands may exist in this district but have not yet been identified. Details can be found on page 57 of the Rural Development Strategy.*

APPENDIX

RURAL STRATEGY GOAL

FULFIL THE ECONOMIC POTENTIAL OF DUBBO'S RURAL AREA WITHIN SUSTAINABLE RESOURCE MANAGEMENT PRINCIPLES.

DEVELOPMENT OPPORTUNITY OBJECTIVES

(Fulfil the economic potential of Dubbo's Rural area)

Agriculture

A more secure future for agriculture in Dubbo and expansion of its economic value

Transport

Safe, efficient transport links between Dubbo and other major centres with capacity for future expansion.

Tourism

Expand Dubbo's rural based tourism industry

Forestry

Expansion of the Dubbo area timber industry

Mining

Allow mines and extractive industries where consistent with environmental objectives.

Recreation

Use the recreation potential of the rural area

Settlement

Direct rural settlement pressures into the rural villages and selected areas of existing fragmentation.

(Note - heritage and cultural resources (both aboriginal and non) are important considerations in the development of the rural area so a separate strategy for cultural resources is being prepared and will be incorporated at that stage)

ENVIRONMENTAL MANAGEMENT OBJECTIVES

(Sustainable resource management principles)

Waterways

Safe, sustainable and multifunctional riverine environments.

Aquifers

Stabilise water levels and water quality in the aquifer.

Flooding

Manage Dubbo's floodplains to minimise the damage of flooding.

Erosion

Prevent the spread of erosion and remedy existing areas.

Dryland Salinity

Prevent the spread of dryland salinity and remedy existing areas.

Wildlife Habitats

A network of habitats able to support the fauna and flora native to this area.

Contaminated Lands

Minimise and Control Contamination of Rural Lands

(Note: whilst weed and fire control are also important issues they can be addressed within the action plans for the other objectives)

Based on the Principles - as referenced - derived from the Rural Issues Paper (see appendix 2 & 3)

Sound, long term economic and environmental management of the rural area of Dubbo

OUTCOME

reliance on government to provide technical advice on Dubbo's strategy where relevant and continuing to act on their land use management responsibilities and powers.

Reliance on landowners being aware of strategy and acting on opportunities seeking advice and/or assistance.

LANDOWNERS

These regulations are still limited by Councils' powers under the same State legislation that led to the 1990 Rural Lands LEP. Council does not intend to further expand its powers.

(Unobtrusive implementation of Strategy - education, promotion and providing information. It relies on the public becoming aware of the strategy and acting on it themselves).

The LEP regulations are the main means of Councils implementing their land use policies. It should facilitate positive development and prohibit or better manage inappropriate land development.

(Further public consultation)

The LEP regulations are the main means of Councils implementing their land use policies. It should facilitate positive development and prohibit or better manage inappropriate land development.

(Positive, active involvement of Council eg seeking grants for landowners, undertaking development itself and leading by example, funding and lobbying).

ASSIST

CONTROL/LEP

ENCOURAGE

IMPLEMENTATION

RURAL DEVELOPMENT STRATEGY AND OBJECTIVES

(policies on all land management issues relevant to Councils' responsibilities under the EPA Act 1979 to direct future land use decisions)

(written in consultation with all of above)
