

## TREE REMOVAL AT WESTERN PLAINS CULTURAL CENTRE

Following the recent storms Council staff have conducted numerous assessments on trees across the region.

A large Angophora floribunda tree at the Western Plains Cultural Centre, Wingewarra Street Dubbo has been identified as unsafe after losing significant limbs during the high winds and requires removal.

The tree will be removed on 21 February 2019 and disruption to the general public will be minimal.

A replacement will be planted at a suitable time in the future.

The background is a solid teal color. It features several stylized virus particles of varying sizes and shades of blue and white. The most prominent is a large, dark blue virus particle in the center, with a lighter blue nucleus and several white, spike-like protrusions. Smaller, similar virus particles are scattered around it, some in lighter shades of blue and white. The overall aesthetic is clean and modern.
