

# TREE REMOVAL AND REPLANTING ALONG KESWICK ACOUSTIC FENCING

Landscaping works along the Keswick Estate Acoustic Fencing are to be undertaken over the next two weeks (weather permitting).

In preparing for the works Dubbo Regional Council has identified 10 trees that will need to be removed from the western section to ensure the longevity of the fence and prevent potential hazards for the houses on the other side of the fence.

Further works along the eastern and western sections will see three trees planted further out from the wall along the stage four fence area, while 14 trees will be planted along the eastern area.

Works on the irrigation line, excavation of holes for new and replacement trees and adjustment of any current irrigation, fixing of stormwater channel post flash flooding event and planting new trees will be undertaken at the site.
